## Knowledge is our strongest asset.

The University of Tennessee certificate rehabilitation formations (CCRP/CERP, etc.) have been the first RACE approved and globally recognized academic credential programs in this field.

The high standards for admission, the globally leading experts teaching and the curriculum being taught worldwide at these academic courses assure graduates that these credentials are recognized as the premiere education in veterinary rehabilitation world wide.

These courses are set up as blended learning programs.

### In detail:

All our formations consist of **e-learning, interactive classroom sessions and clinical onsite labs**. We work in small groups securing most efficient learning. Additionally we guide you during your specialization and beyond with group and personal coaching, access to rounds and more. As a student and certified practitioner you also have access to special conditions for modalities, services and literature.

As we all spend a very intensive time together, there is a lot of opportunity to further discuss open questions beyond the course hours. This makes this education so effective. We start early in this education to become a community of professionals with a common goal: **to improve survival and quality of life of our patients.**

We not only teach you but coach you through your specialization and beyond.

Warm regards

Dr. Beate Egner  
CEO
